Bruegel is the European think tank specialising in economics. Established in 2005, Bruegel is independent and non-doctrinal. Its mission is to improve the quality of economic policy with open and evidence-based research, analysis and debate.

Bruegel is registered as a Belgian international non-profit association (Association Internationale Sans But Lucratif) under the number 0867636096, with registered offices at rue de la Charité 33, B-1210 Brussels. The basis for its governance is found in its statute and bylaws.

The consequences of the health, economic and financial global crisis are likely to be considerable not only in the medium term but also in the long term. The international community will be called on to make major efforts to reinforce resilience and sustainability in all aspects of globalisation. The paradox of this crisis is that there was no real global mobilisation at the beginning of this crisis. In particular and unlike in previous crises, the initial reaction of the G20 was weak. It is clear that multilateralism went backwards during the last few years, under the pressure of nationalism in both advanced and emerging countries. This is very unfortunate: responding effectively to the worst global crisis since the Second World War requires global cooperation and mutual understanding.

This is the context in which we celebrate 70 years of European integration. When European integration started, the only big single market was the United States of America. Today, in addition to China, there are many sizeable single markets with single currencies in the emerging world. European unity is thus more important than ever to give Europe a say in the world. But much progress remains to be made in so many dimensions: bringing all sectors into the single market, energy policy, the digital economy, achievement of banking union, capital markets union, external and domestic security and, ultimately, political union. In this period, it is particularly important to stress that the European project is built on Treaties and on full respect for the European institutions that safeguard them.

I can hardly think of a better place than Bruegel to analyse the many very difficult choices that confront global and European policymakers. Bruegel scholars provide a unique combination of deep economic expertise, profound institutional knowledge and a clear understanding of the decision-making process. The COVID-19 pandemic made even more pressing the need
for their deep analysis, based on facts, impartiality and rigour.
Bruegel is a professional, independent, transparent and evidence-based think-tank, non-partisan in policy discussions. We are determined to preserve this orientation as we approach new highly demanding policy challenges. We will also continue to strengthen our impact in the public debate, and our outreach in Europe and the wider world, building on 2019 when Bruegel featured in numerous articles and discussions in the world’s most respected media outlets.
Let me finish with some words of appreciation. On behalf of all my colleagues on the board, whom I thank for their own personal dedication to Bruegel, I would like to recognise the extremely valuable support of our members, friends and partners, who help Bruegel to remain a world-class institution. Let me thank all Bruegel scholars and the entire team for their outstanding work. Last but not least, let me thank Bruegel’s director, deputy director and management team, under whose leadership Bruegel has been ranked, by the University of Pennsylvania’s Global GoTo Think Tank Index, the best think tank in the world outside the US, and the second best including the US.
As I write this foreword in May 2020, looking back at 2019 seems like looking back to a different era. We are in the midst of a pandemic that has huge implications for our societies and the global economy. Like most institutions, Bruegel has had to adapt fast to the new world. Staff members are teleworking. All events have become fully online. And we have seen unprecedented demand for our expertise. Media and event statistics have reached all-time highs. Our weekly calls with members are booked solid. Also our world looked very different only two months ago.

Many of the topics Bruegel worked on in 2019 have not receded in importance, but have rather become even more central because of the effects of the pandemic. An example is global interdependence in both financial and trade terms and the question of what kind of sovereignty Europe has to manage those effectively. We prepared a set of memos for the new European leadership that took office in 2019, advocating a clear appreciation of the strong interlinkages across political areas in a geopolitical age. We also highlighted why a greening of Europe's economy is needed and how it can be done. The candidates for the European Commission presidency from all the main political families spoke at Bruegel events ahead of the 2019 European elections. We analysed Europe's financial system and how it changes with the departure of Europe's largest financial centre from the EU – the city of London. Finally, we focused on the digitalisation of Europe's economy, providing critical input to the development of Europe's artificial intelligence strategy.

As the global and the European economies are now going through
the deepest GDP contraction since the Second World War, the European project looks fragile. Many of our 2019 research questions are now even more urgent: the disruptions to economic activity in terms of output, global supply chains and demand; the strains on Europe’s single market and the shape of its monetary union; and the dramatic effects of the crisis on inequality.

Rest assured that our team of more than 40 researchers and 60 staff members is committed to impartiality and evidence-based research, striving for innovative ideas, practical suggestions and high-impact events that will stimulate and shape debates, and ultimately improve economic policy. Also on behalf of Bruegel’s deputy director, I want to thank all members, partners and colleagues for making 2019 a successful year. I look forward to continuing the work in 2020 and would like to thank you for your continued support in these demanding times.
A STRUCTURED VISION
Matrix and design
The research cycle, step by step

Evidence-based policy recommendations

Bruegel scholars use data-driven analysis to assess economic processes, discuss policy options and make proposals. We aim for our recommendations to be feasible and are not limited by political red lines. Bruegel does not stand for any particular policy doctrine or political dogma.

Demand-driven questions, independent answers

Bruegel’s researchers, members and partners work together to design the research programme. The board takes the final decision on the research programme based on a proposal from the director and deputy director. Once a topic or question is chosen, the research team work independently. All publications reflect the work and views of their authors. Bruegel takes no institutional standpoint. The director exercises editorial oversight and quality control.
Bruegel is a forum for policy debate between individuals from diverse backgrounds and sectors. Publications, events, social media, the Bruegel blog and podcasts serve to focus the debate on specific topics. Bruegel also cooperates with leading European and international research institutions on specific research projects or exchange programmes.

Bruegel scholars address policy areas relevant to individual countries, the European Union, wider Europe and global governance groups and international organisations. Scholars are in contact with decision-makers at every governance level and in many parts of the world.
OUR COMMITMENT TO TRANSPARENCY

Independence and integrity

Independence and integrity are essential for the credibility of any think tank. Transparify, an independent NGO, has repeatedly awarded Bruegel five stars out of five for transparency, recognising its openness about financing and governance. However, transparency is about more than just money.

Bruegel’s statement on research integrity, adopted by the board in May 2006, is available on our website. The statement sets out rules for the avoidance of political, national or commercial conflicts of interest that could harm the integrity of Bruegel’s research. It helps staff and scholars avoid capture by any particular interests. Bruegel researchers and senior staff promise to abide by this statement when they sign contracts with Bruegel.

Scholars and managers also make annual declarations of outside interests, which is available on the Bruegel website. These interests are not just financial: it is important for readers to be aware of other potential influences on a scholar’s work. These public declarations are extensive and represent the highest standard of public transparency for think tanks.

Every three years, an independent review task force group appointed by members evaluates all aspects of Bruegel’s work, from research to management.
Bruegel's scientific council delivers an evaluation report on the academic standard of Bruegel's publications, which informs the research strategy and serves as a basis for the work of the review task force.

Finally, Bruegel's commitment to transparency means that we publish detailed financial statements every year (see page 87). Our accounts are independently audited. We detail the origin of every cent of income, and we also report spending broken down by budget line. The financial statements show clearly what each member contributed in any given year, a level of transparency that is rare in our sector. Bruegel's state members also have the right to audit Bruegel at any time.
A NETWORK
OF TALENTS

A diverse team making the difference
The team includes senior fellows and non-resident fellows, research fellows and affiliate fellows. Research fellows have several years of professional experience while senior fellows and non-resident fellows are highly recognised scholars with significant experience of contributing to policymaking. Affiliate fellows are typically younger scholars still working on their doctorates.

Bruegel strives for a geographically diverse team. Visiting fellows add to this diversity, coming from internationally recognised institutes to stay at Bruegel temporarily to conduct research work. They interact with other fellows, members and a wider audience.

Fellows rely on a team of research analysts, assistants and interns whose skills and commitment are gratefully acknowledged.

A dedicated non-research team is responsible for the daily management, outreach and development of the organisation.
RESEARCH TEAM

Bruegel relies on a diverse, international research team
 Carlo’s research focuses on international trade and investment, the political economy of globalisation and the process of European integration. He is associate professor of economics of European integration at Bocconi University, and professor of macroeconomics and international business environment at SDA Bocconi School of Management. He received his PhD in applied economics at the Catholic University of Leuven.

Agnès is Professor at the Paris School of Economics - University of Paris 1 Panthéon Sorbonne. Prior, she was the Executive Chair of the French Council of economic analysis. She worked for the French ministry of economy and finance, before moving to academic positions successively at the universities of Cergy-Pontoise, Lille 2, Pans-Ouest and École Polytechnique. She also served as a Deputy-director and as a Director of CEPII and is affiliated with CESifo and IZA. She is a Member of the Commission économique de la Nation (an advisory body to the finance minister) of the French macro-prudential authority and of the Banque de France’s Board.

Suman’s writing includes contributions on the political economy of reform, financial sector and banking reform and energy trends and policy. He used to be Shell’s chief economist. He is currently also Senior Fellow of the Mastercard Center for Inclusive Growth. He is based in New Delhi. Suman had earlier served as Director-General (Chief Executive) of the National Council of Applied Economic Research (NCAER), New Delhi. At various times Suman was a member of the prime minister’s Economic Advisory Council, of India’s Statistical Commission and of the Reserve Bank of India’s Technical Advisory Committee on Monetary Policy.

Rebecca was a political correspondent in Brussels for Bloomberg News from 2011 to 2016. From 2017 to early 2019 she has been a consultant to the European Stability Mechanism, and during part of that time she also served as an expert adviser to a European Economic and Social Committee panel on taxation. During a 22-year career in daily journalism, she wrote for a broad range of newspapers and wire services, from the Bend (Oregon) Bulletin to the UK-based Financial Times. She was a Washington correspondent for 7 years with Dow Jones Newswires and the Wall Street Journal, covering the U.S. Treasury, the Federal Reserve and the Pentagon.
Grégory’s research interests include international macroeconomics and finance, central banking and European governance. From 2006 to 2009 Grégory worked as an economist in the research department of the French bank Crédit Agricole. Grégory is an associate professor at the Conservatoire National des Arts et Métiers in Paris where he teaches macroeconomics. He previously taught undergraduate macroeconomics at Sciences Po in Paris. He holds a PhD in economics from the European University Institute (Florence), an MSc in economics from Paris X University and an MSc in management from HEC (Paris).

Marek focuses on economic reforms and prospects in Russia, Ukraine and central Europe. He is a professor at the Higher School of Economics in Moscow and was a fellow under the 2014-2015 fellowship initiative of the European Commission. He was previously first deputy minister of finance of Poland, a member of the Polish Parliament and a member of the Monetary Policy Council of the National Bank of Poland.

Uri’s work focuses on trends in the global economy and on the challenge countries face through flows of trade, finance, and migration. Based in Washington, DC, he is also a senior fellow at the OCP Policy Center. He is also the principal of Economic Policy International, LLC and teaches at the School of Public Policy at the University of Maryland, the École des Hautes Études Commerciales (HEC) and the Mohammed VI Polytechnic. He is a co-chair of the Trade, Investment and Globalization Task-Force of the T20. He was vice-chair of the Global Agenda Council on Trade and Investment at the World Economic Forum.

Zsolt’s research interests include macroeconomics, international economics, central banking and time-series analysis. He is also a research fellow at the Institute of Economics of the Hungarian Academy of Sciences. From 2005 to 2008, he was a research adviser to the Argenta Financial Research Group in Budapest. Zsolt holds a PhD in economics from Corvinus University of Budapest. From 1994 to 2005, he worked in the research department of the Central Bank of Hungary, where he was deputy head.
Maria is the deputy director of Bruegel. She has previously worked at the European Commission and the research department of the Dutch Central Bank. She has also held academic positions at the Harvard Kennedy School of Government in the USA and the University of Strathclyde in the UK, from where she holds a PhD in economics. She has published extensively in international academic journals and contributed regularly to both the European Commission’s and the Dutch Central Bank’s policy outlets.

Alicia is a senior fellow at Bruegel and she is also the chief economist for the Asia Pacific region at NATIXIS, based in Hong Kong. Alicia is currently an adjunct professor at City University of Hong Kong and Hong Kong University of Science and Technology (HKUST). Alicia holds a PhD in economics from George Washington University. Previous positions include chief economist for emerging markets at BBVA, and senior positions at the BIS, the Bank of Spain, the European Central Bank, and economist at the International Monetary Fund. She has published extensively in journals and books.

Henrik focuses on economic aspects of trade law and competition law. He is a senior research fellow at the Research Institute of Industrial Economics, Stockholm, and chief reporter for an American Law Institute project on the Principles of the World Trade Organisation (WTO) Agreement. Previously, he held positions as professor of International Economics at Stockholm University, as a judge in the Swedish supreme court for competition law cases, and worked for four years at the Economic Research and Analysis Division of the WTO.

Alexander is an expert in financial regulation, pension systems and trade policies. He was the lead economist with the European Bank for Reconstruction and Development (EBRD) in Warsaw. Previously, Alex was with the Policy Review Department of the International Monetary Fund in Washington, acted as consultant for the World Trade Organisation and the central Bank of Mexico, and worked in research and teaching positions at the Royal Institute of International Affairs (Chatham House) and the London School of Economics. He holds a PhD in economics from Oxford University.
Michael is an expert on the future of Europe, Brexit, energy, enlargement, Turkey, the Mediterranean, the Middle East and neighbourhood policy. He is Academic Director of the Masters in European Public Policy programme at Johns Hopkins University, School of Advanced International Studies in Bologna, Italy and a senior adviser on public policy and government affairs at Covington, Brussels. He worked for more than 30 year in policy making, lastly as director general for EU enlargement in the European Commission. He holds a bachelor’s degree in Philosophy, Politics and Economics from Oxford University and a PhD in Political Science from M.I.T.

Dalia’s research interests are in international economics, corporate finance and the organisation of the firm, and emerging market economies. She holds the chair in international economics at the University of Munich. Dalia is a fellow of the Centre for Economic Policy Research (CEPR), London, and a member of the International Trade and Organization Working Group of the National Bureau of Economic Research (NBER) in Cambridge. She has been team leader at the Russian European Center for Economic Policy in Moscow and has acted as a consultant for international organisations.

Scott is an expert in policy and regulatory issues related to digital services and electronic communications. His recent research focused on the European Digital Single Market (DSM), with an emphasis on cross-border e-commerce, privacy, and geo-blocking. He made contributions to the European Commission’s proposed European Electronic Communications Code (EECC). He is a member of the Scientific Committee of the Communications and Media Programme of the Florence School of Regulation, European University Institute in Italy. Scott holds a BA in political science (PA) from the City College of New York, and an MS from the School of Engineering, Columbia University.

Emmanuel’s research ranges across a variety of topics in European and international economic relations, including European monetary integration, the development of Western European financial regulation in the 1960s-1980s, and the rise of the European Council. He is Lord Kelvin Adam Smith fellow in the Adam Smith Business School, University of Glasgow. Prior to this, he was Pinto Post-Doctoral fellow at LSE IDEAS, the London School of Economics’ centre for the study of international affairs. He is also visiting professor at the Université Libre de Bruxelles.
Francesco is an expert on international economics and monetary policy. Between 1998 and 2012, he was the director general for market operations at the European Central Bank. He worked previously at the Banca d’Italia, first as director of the international section of the research department and then as deputy head of the foreign department. He is also the chair of the selection panel of the Hellenic Financial Stability Fund (HFSF). Mr Papadia has a degree in law from the University of Rome and attended postgraduate studies in economics and business at the Istituto Adriano Olivetti in Ancona and at the London Business School.

Georgios' research at Bruegel focuses on the digital economy, market definition in the digital era, the economic value of big data and their resultant privacy concerns, and the welfare implications of the emergence of the sharing economy. He holds a bachelor’s degree in Physics from Aristotle University of Thessaloniki and a master’s degree in econometrics and mathematical economics from Tilburg University. He holds a PhD from Toulouse School of Economics and he is currently Marie Curie fellow at MIT Digital Lab.

Jean is an expert on European macroeconomics, governance and international economics. He is a professor at European University Institute (EUI), Sciences Po Paris and the Hertie School of Governance in Berlin. He was the director of Emmanuel Macron’s successful presidential campaign in France. From 2013 to 2017, he served as commissioner-general of France Stratégie, the French government’s lab of ideas. He contributed to Bruegel’s creation and from 2005 to 2013, was Bruegel’s director. Prior to founding Bruegel, he was also executive president of the French PM’s Council of Economic Analysis, senior economic adviser to the French minister of finance, director of CEPII, the French institute for international economics, and economic adviser with the European Commission.

Niclas’ research interests include international trade, international macroeconomics and the digital economy. He is working on topics on e-commerce in trade as well as European trade policy in global trade wars. Furthermore he is interested in topics on income inequality and welfare state policies.

He holds a Ph.D. in Economics from Universitat de Barcelona, a M.Sc. in economics from the Universität Bonn, and a B.Sc. from Universität Mannheim. During his Ph.D. he was a visiting scholar at Northwestern University.
Dirk has published research on central banking, financial supervision and stability, European financial integration and climate change. He is a professor of banking and finance at Rotterdam School of Management, Erasmus University Rotterdam. He is also a member of the Advisory Scientific Committee of the European Systemic Risk Board at the ECB and a research fellow at the Centre for European Policy Research (CEPR). Dirk was dean of the Duisenberg School of Finance from 2009 to 2015. From 1998 to 2008, he served at the Ministry of Finance in the Netherlands.

Simone is an expert in international energy and climate issues. Before joining Bruegel he spent a year in Istanbul as a visiting researcher at the Istanbul Policy Center at Sabanci University. He is also a senior researcher at the Fondazione Eni Enrico Mattei and adjunct professor at the Johns Hopkins University. He holds a master’s degree in international relations from the Faculty of Political and Social Sciences of the Università Cattolica del Sacro Cuore in Milan, where he completed his PhD on European and Mediterranean energy relations at the department of international economics, institutions and development.

Bruno’s research focuses on the effectiveness of several policy tools (R&D subsidies, R&D tax credits, intellectual property, public research and regulatory policies) aimed at stimulating innovation in Europe. He was the chief economist of the European Patent Office (EPO) from November 2005 to the end of 2007. Since 1999 he has been a professor at the Brussels ULB. As holder of the Solvay S.A. Chair of Innovation, he teaches courses related to the economics and management of innovation and intellectual property.
Nicolas’ research is about financial systems and financial reform around the world, including global financial regulatory initiatives and current developments in the European Union, banking supervision and crisis management, financial reporting, the euro-area policy framework and economic nationalism. He was a co-founder of Bruegel in 2002. He joined the Peterson Institute as a visiting fellow in 2009 and divides his time between the US and Europe. He is a board member of the derivatives arm (Global Trade Repository) of the Depositary Trust and Clearing Corporation (DTCC), a financial infrastructure company that operates globally on a non-profit basis.

Reinhilde’s research focuses on industrial organisation, international economics and strategy, innovation, and science. She is a full-time professor at the University of Leuven in the Department of Management, Strategy and Innovation. She has been a senior fellow at Bruegel since 2009. She is also a CEPR research fellow and a member of the Royal Flemish Academy of Belgium for Sciences. From 2004-2008, she was an adviser for the European Commission’s Bureau of European Policy Analysis (BEPA). She was the president-elect of EARIE (European Association for Research in Industrial Economics) and she also served on the ERC Scientific Council.

Stefanie is professor for international relations and political economy at the Department of Political Science at the University of Zurich and Director of the Center for Comparative and International Studies (CIS). She graduated from ETH Zurich in 2007 with a PhD in Political Science and a dissertation on the political economy of currency crises in 2007. She concentrates on the fields of international and comparative political economy, with a particular focus on how distributional conflicts, policy preferences and institutions affect economic policy outcomes.

Thomas is an expert on EU economic policies, financial stability and European governance. He joined Bruegel in February 2018, previously he was president of the Euro Working Group and of the European Financial Committee of the European Union. He previously chaired the Committee between March 2009 and March 2011. Before becoming president of the EWG/EFC, he was director general for Economic Policy and Financial Markets in the Ministry of Finance, Vienna. He is currently also chairing a Wise Persons Group mandated by the Council to review the European Financial Architecture for Development.
Guntram is Bruegel’s director. His research focuses on the European economy and governance, fiscal and monetary policy and global finance. He regularly testifies to the European finance ministers’ informal ECOFIN meeting, the European Parliament, and national parliaments. During 2012-16, he was a member of the French prime minister’s economic advisory council. He previously worked at the European Commission on macroeconomics and governance of the euro area and the Deutsche Bundesbank. He is also a fellow of the Centre for Economic Policy Research (CEPR). Guntram holds a PhD in economics from the University of Bonn and has taught in Pittsburgh and Brussels.

Georg’s work at Bruegel focuses on energy and climate-change issues. He is also an expert on Ukraine. He is a member of the German Advisory Group in Ukraine and the German Economic Team in Belarus and Moldova. Previously, he worked at the German Ministry of Finance and the German Institute for Economic Research in Berlin. He has worked on the EU emissions trading system, the European electricity market and European renewables policy. In addition, he covers fuel and commodity markets. Georg holds a PhD from the Technical University of Dresden, and a diploma in economics from Humboldt University, Berlin.

Jianwei’s research mainly focuses on international economics and labour economics. He is particularly interested in topics related to China’s economic transformation and foreign relationship. Xu is an associate professor at Beijing Normal University, and also works as an affiliate fellow at China Academy of Social Science and a youth member of the China Finance Forum 40. Prior to this, he completed an internship at the Development Research Center of the State Council in China as a research assistant. He holds a PhD from Peking University.

Stavros’ research focuses on sovereign debt issues. During 2013-2014 he was vice-chairman of the Cyprus Council of Economic Advisors and served on the Board of the Central Bank of Cyprus (2014-2015). He served as president of UNICA-Universities of European Capitals (2004-2012) and as rector of the University of Cyprus (2002-2010). He is a professor of finance and management science at University of Cyprus. He received a PhD in engineering management systems from Princeton University. He also studied mathematics at University of London and electrical engineering with the Higher Technical Institute in Cyprus.

Bruegel’s mission is to improve economic policy. This means persuading policymakers to consider and adopt the research and recommendations of Bruegel scholars.

Being present in public debates is fundamental to our strategy. Through our publications, social media, blog, podcasts, events and press outreach, Bruegel has carved out a discussion space for economic policy.

OUR EVENTS, BEYOND BRUSSELS
Where policies meet fact-based research

Bruegel’s ability to bring together policy-influential people, in Brussels and beyond, means that our events achieve several strategic goals: helping to set the policy agenda, exploring pragmatic solutions to political impasses, and analysing the policy relevance of current economic research.

Our different event formats address different needs. Smaller meetings help inform our research and shape thinking of influential invitees, while larger conferences offer space for debate and the chance to hold officials to account.

WE ORGANISED 77 EVENTS AND REACHED OUT TO 34,500 PEOPLE ALSO THROUGH ONLINE LIVESTREAM, AUDIO AND VIDEO RECORDINGS.

Jihad Azour - Director of the Middle East and Central Asia Department, IMF / Elżbieta Bieńkowska - European Commissioner for Internal Market, Industry, Entrepreneurship & SMEs / Lorenzo Bini Smaghi - Chairman, Société Générale / Simon Birmingham - Minister for Trade, Tourism and Investment, Australia / Laurence Boone - Chief Economist, OECD / Patrick Child - Deputy Director-General, European Commission, DG RTD / Vítor Constâncio - Former Vice-President, ECB / Jon Cunliffe - Deputy Governor, Bank of England / Aart De Geus - Chairman and CEO, Bertelsmann Stiftung / Bas Eickhout - Member of European Parliament / Baroness Kishwer Falkner of Margravine - Member, Bank of England Enforcement Decision-Making Committee / Ambroise Fayolle - Vice-President, European Investment Bank / Luis Garicano - Member of European Parliament / Sven Giegold - Executive Director, International Trade Center / Gita Gopinath - Economic Counsellor and Director of the Research Department IMF / Danuta Hübner - Member of European Parliament / Korbinian Ibel - Director-General, European Central Bank / Elke König - Chairman, Single Resolution Board / Pascal Lamy - Honorary President, Notre Europe - Jacques Delors Institute / Bernd Lange - Member and Chair of INTA Committee, European Parliament / Bruno Le Maire - Minister of Economy and Finance, France / Cecilia Malmström - European Commissioner for Trade / Pierre Moscovici - European Commissioner for Economic and Financial Affairs, Taxation and Customs / Luiz Awazu Pereira da Silva - Deputy Governor, Banco Central do Brasil / Mauro Petriccione - Director-General, European Commission, DG CLIMA / Klaus Regling - CEO, European Stability Mechanism / Maria Spyrraki, Member of European Parliament / Alexander Stubb - Vice-President, European Investment Bank / Frans Timmermans - Vice-President, European Commission / Laura Tyson - Distinguished Professor of the Graduate School, University of California, Berkeley / Yanis Varoufakis - Founder, Democracy in Europe Movement 2025 / Margrethe Vestager - Executive Vice-President, European Commission / Boris Vujcic - Governor, Croatian National Bank
CONFERENCES
Public and live streamed events that provide a forum for a wider audience and space for debate, holding officials to account

SEMINARS
High level policymakers, stakeholders, Bruegel members and experts engage in frank discussions to explore pragmatic solutions to political impasses

WORKSHOPS
Our members and scholars get together with other experts to contribute to ongoing research or brainstorm about timely issues
REINHILDE VEUGELERS (BRUEGEL), CLAIRE BURY (EUROPEAN COMMISSION), JOAKIM REITER (VODAFONE) AND VICTORIA ROIG (SANTANDER) DISCUSS HOW EUROPE CAN THRIVE IN THE DIGITAL AGE
In the run up of the European election campaign in 2019 we organised a series of talks and debates with Europe’s Spitzenkandidaten and political leaders. Journalists from the Financial Times and Bruegel’s scholars explored and challenged the main European political parties’ policies for the future of the continent, in front of an invited audience.
The candidates that took part in the event series were Bas Eickhout of the European Green Party, Luis Garicano of Alliance of Liberals and Democrats in Europe (ALDE), Yanis Varoufakis of Democracy in Europe (DiEM25), Manfred Weber of the European Peoples Party (EPP) and Jan Zahradil of the Alliance of Conservatives and Reformists in Europe (ECR).

In time for the nomination hearings of the new commissioners and the development of the Commission’s agenda, Bruegel published a set of 16 Memos, intended as a strategic to-do list for the next five years for the commissioners and the new presidents.
Those who seek a succinct overview of the EU’s potential course of action over the next five years are unlikely to find a better starting point.

Andrew Moravcsik

*Foreign Affairs, issue March/April 2020*

**FOREIGN AFFAIRS**
Bruegel is an active supporter of The Brussels Binder, a database of female experts that seeks to increase the presence of women in policy debates. Bruegel provides support through the involvement of several members of Bruegel’s staff in the initiative’s management committee.

Together with a wide network of European think-tanks supporting the initiative, Bruegel therefore contributes to increasing gender diversity in the current policy discussions that guide Europe’s future. Together with GMF, Bruegel received funding from the European Commission to hire a shared staff member to connect The Brussels Binder with like-minded organisations throughout Europe.

In 2019, 31% of speakers at Bruegel’s events were women.
Making our voice heard by decision-makers

Bruegel scholars spoke at the European Parliament and at numerous national parliaments during the year. They also gave evidence to informal meetings of EU finance ministers.

The implications of no deal Brexit: is the EU prepared? Guntram B. Wolff, note written at the request of the Bundestag EU committee, 14 January.

Effectiveness of cohesion policy: Learning from the project characteristics that produce the best results, Zsolt Darvas, Antoine Mathieu Collin, Jan Mazza and Catarina Midoes, evidence to the European Parliament’s Committee on Budgetary Control, 27 March.

Promoting sustainable and inclusive growth and convergence in the European Union, Maria Demertzis, André Sapir, and Guntram B. Wolff, Policy Contribution prepared for the Informal ECOFIN Meeting in Bucharest on 5 April.

Taking stock of the Single Resolution Board: Banking union scrutiny, Nicolas Véron, in-depth analysis, requested by the European Parliament’s Economic and Monetary Affairs Committee, 18 April.

Hybrid and cybersecurity threats and the European Union’s financial system, Maria Demertzis and Guntram B. Wolff, Policy Contribution prepared for the informal meeting of EU economic and financial affairs ministers (Ecofin) in Helsinki, 13-14 September.

The next generation of digital currencies: in search of stability, Grégory Claeys and Maria Demertzis, Policy Contribution prepared for the European Parliament’s Economic and Monetary Affairs Committee, 2 December.

Impediments to resolvability of banks, Alexander Lehmann, in-depth analysis, requested by the European Parliament’s Economic and Monetary Affairs Committee, 18 December.
With a portfolio of 20 EU-funded research projects, Bruegel fellows regularly have the opportunity to provide expertise and exchange views with the EU institutions’ policymakers, and to engage in academic networks across Europe. Bruegel provides regular briefings to the European Parliament, notably in the framework of the monetary dialogue with the European Central Bank and the parliamentary hearings of the Single Resolution Board’s chair.

Periodically, Bruegel also delivers longer studies to the Parliament or the Commission. For instance, in 2019, Bruegel fellows provided an in-depth analysis of the effectiveness of cohesion policy, assessed the EU’s potential to be a global centre for research and innovation excellence, and contributed to a large comparative study on insolvency...
laws in EU countries. Bruegel also contributed papers and organised two seminars with the EU Delegation to Russia and the EU-Russia Expert Network on Foreign Policy, to discuss Russia’s long-term growth prospects and Russian trade relations with the EU and China.

Bruegel is a partner in four multiannual research projects funded under the highly competitive Horizon 2020 programme, collaborating with top European academic institutions (including Oxford University, Science-Po Paris and the Hertie School of Governance) to tackle big policy challenges. Projects include designing emissions reduction policies (COP21 RIPPLES and PARIS REINFORCE), solving the productivity puzzle (MICROPROD), and shaping the future of European integration and governance (EU3D).
RESEARCH LANDSCAPE
Expanding the horizons
POLICY RELEVANCE WITH ACADEMIC GROUNDING

Bruegel scholars regularly publish in academic outlets. And while not every fellow has to publish every year in top journals, we are convinced that high academic standards are conducive to high-quality policy recommendations. All significant Bruegel policy papers therefore undergo a collective feedback process within the research team. Selected academic publications by Bruegel scholars are listed below.

Financial Intermediation in an Era of Transformational Technology’, in Geneva Reports on the World Economy, 22, CEPR / ICMB.

In 2019, the leadership of the European institutions changed and the EU went through the final phases of the Brexit negotiations. Bruegel scholars continued to suggest macroeconomic and governance strategies for European and national policymakers. Research focused on questions including how to deal with a possible recession, the measurement and drivers of productivity in a digital, transformative age, challenges to EU cohesion, and how to reverse divergences in welfare levels, observed especially in parts of southern Europe. On Brexit, the focus has moved to the future relationship rather than transition arrangements. As in previous years, such questions cannot be studied in isolation. Issues of competition policy and industrial policy more generally have been defining characteristics of the growth agenda and managing the macroeconomic cycle.
MEMO TO CHRISTINE LAGARDE

EU BUDGET FOR PUBLIC GOOD

GREENING THE EUROPEAN CENTRAL BANK

FIGHTING TAX FRAUD

FOR PUBLIC GOOD
The EU budget should provide truly European public goods that benefit every European country, in which case net balances should matter less. But in practice, this is not the case. If the largest net contributors believe that a big share of the EU budget is redistributed to countries for spending which do not constitute European public goods, or there are risks for their improper use, the attempt to reduce the overall size of the budget and thus net contributions is understandable.

Zsolt Darvas
Tax coordination in the European Union is notoriously difficult. There are however reasons for hope since the international debate is moving, the awareness among the European public has increased, digital tools offer new opportunities to address tax avoidance and fraud, and the green transition is providing a new impulse.

Agnes Benassy-Quere

EURO-AREA INFLATION, CORE, ACTUAL AND MARKET EXPECTATIONS (YEAR-ON-YEAR, %)

Brussels is beginning to define what will make up the European Green Deal. But the ECB has still a carbon bias in its monetary policy operations. We proposed a tilting approach to steer the allocation of the ECB’s assets towards low-carbon sectors. This reduces the cost of capital for those sectors relative to high-carbon sectors. The ECB would then support in practice the European Green Deal.

Dirk Schoenmaker
The European Central Bank’s main tools are nearly exhausted, the monetary union in which it operates is still incomplete, and it lacks an understanding of what the ‘new normal’ looks like. To be able to face these challenges, we argued that the ECB should review its strategy, and President Lagarde decided as soon as she took office that such process should be undertaken starting in 2020.

Grégory Claeys
Trade conflicts, the exercising by states of economic power and the emergence of hybrid threats to financial markets showed the growing importance of economics in global politics and global politics in economic relations in 2019. Bruegel scholars explored the consequences of these trends for the EU and evaluated, in particular, the EU’s relationship with China.

Bruegel scholars analysed how Europe can reinforce its economic sovereignty in the current global order, in which China and the US are using their economic might to gain geopolitical advantage. As well as discussing the threats to the EU, their research concluded that internal governance reforms are necessary to equip the EU to be an effective player in this new global game.

With politics taking a turn towards populism and protectionism, our scholars focused also on inequality, taking into account the role of international trade and the influence of specific regions, such as India and China.
CHINA BEYOND THE TRADE WAR

China has become central to our analysis of Europe more than ever before. The most obvious reason has been the trade war with the US, which has forced the EU to rethink its strategic alliance with the US, alongside its engagement with China. Beyond the trade war, China’s technological upgrade has changed the nature of Europe’s trade relationship with China from complementary to much more competitive. For these two reasons, Bruegel’s analysis of China offers guidance for EU policymakers on key strategic issues for our future.

Alicia García-Herrero

Downplaying the trade war?

The direct overall effects of the commercial war on the standard of living in the United States or China, although negative, are probably very small, he wrote in a contribution to the think tank Bruegel Uri Dadush. The exchange of goods and services for large economies such as the US or China accounts for only a small part of GDP. "The damage caused by the slowdown in the global economy poses a greater risk for a Europe whose economy depends on trade," - Dadush notes.

A threat for Europe

Alicia García-Herrero, researcher at the Bruegel think-tank, is among those who have warned that a trade deal “could cost Europe dearly” if China substitutes a large part of its European imports for U.S. goods in a bid to appease the Trump administration.

MARKUS EDERER, AMBASSADOR OF THE EUROPEAN UNION TO RUSSIA, GUNTRAM WOLFF AND GEORG ZACHMANN AT BRUEGEL ON SEPTEMBER 9, 2019

SEMINAR ON TRADE RELATIONS BETWEEN THE EU, CHINA AND RUSSIA

REUTERS
Bruegel actively promotes a global dialogue between European and Asian policy experts and economists. The Asia-Europe Economic Forum is Bruegel's leading initiative in Asia.

The yearly forum alternates between Asia and Europe and is jointly organised with the Centre d’Études Prospectives et d’Information Internationale (CEPII), the Bertelsmann Stiftung on the European side. On the Asian side, the co-organisers are the Asian Development Bank Institute, the Korea Institute for International Economic Policy (KIEP) and Shanghai Jiaotong University with the contribution of the Asia-Europe Foundation (ASEF) in Singapore.

It is an event only for invited speakers, who include former and current high-ranking officials, senior parliamentarians, central bank governors, prominent academics and private-sector economists.

The 2019 AEEF took place in Berlin.
Trade in 2019

In 2019, three developments were particularly important for EU trade policy. First were bilateral free trade agreements with two important Asian partners: the EU-Japan Economic Partnership Agreement (EUJEPA), the largest bilateral trade deal ever concluded by the EU in terms of market size, which entered into force in February 2019; and the EU-Singapore FTA, which entered into force in November 2019. The second development was the continuous unilateral trade measures by US President Trump against imports from various trade partners, with directly and indirect effects on EU producers. Against this background, there was little progress in bilateral discussions between the EU and the US on a transatlantic free trade agreement. The third development was the situation at the World Trade Organisation, where President Trump made good on his threat to refuse the appointment of new judges to the Appellate Body, significantly weakening the functioning of the WTO’s dispute settlement mechanism. The EU has promoted an alternative mechanism and has rallied significant support for its proposal, but at the time of this writing (February 2020) there was still no new multilateral mechanism in place.

André Sapir
Prominent scholars including Jean Pisani-Ferry, Jeremy Shapiro and Guntram Wolff have put together a timely set of recommendations for the next European Commission, urging Brussels to redefine Europe’s “economic sovereignty” in the face of harsh new global realities. “Economic connections, from cyberspace to financial links, are becoming the primary areas of great-power competition and are increasingly at risk of being weaponised. Powerful countries often no longer abide by the primacy of economics.”

**FINANCIAL TIMES**

Economics used to play a limited role in foreign policy, which was about wars, conflicts and human disasters – and how to avoid them. But neither China nor the United States separate economic relations from geopolitics. The competition between them is simultaneously an economic competition and a security competition. This is a threat to the multilateral system the European Union has relied on for nearly seven decades and to the EU’s separation of external economic relationships from geopolitics. The EU must redefine its concept of economic sovereignty and sharpen the instruments it needs to defend and promote it.

Guntram B. Wolff
Europe’s banking union represents a regime change in European financial policy, and its consequences will reverberate for many years.

Bruegel’s researchers continue to contribute to debates about implementation, and to the identification of the next steps of policy development, such as the creation of a European deposit insurance scheme and potential limits on banks’ sovereign exposures, while addressing financial stability risks, including safe assets. Beyond these issues, the sustainable finance agenda is becoming important in the context of the EU. Our scholars examined the structural change that is required in the European financial sector as it comes under more scrutiny in relation to climate risks. Moreover, hybrid threats and the risks to financial systems of the digital transformation, have been explored. Our scholars have also examined the topic of anti-money-laundering and how new mechanisms could protect against this crime while reinforcing European financial stability.
CHALLENGES AHEAD FOR THE EUROPEAN LEADERSHIP

HYBRID THREATS
The main task of the European Commission under Ursula von der Leyen in the area of financial services is the completion of the banking union, which should be understood as a package of measures to effectively deliver the stated aim of breaking the vicious circle between banks and sovereigns. This is achievable but will require significant political effort.

Nicolas Véron

Deepening the Single Market

Tackling national regulations that hamper trade is essential if the single market is to keep pace with Europe’s ever more service-led business landscape, says Nicolas Véron of Bruegel. “If you do nothing to deepen the single market [to include services],” he says, “it covers a shrinking part of the economy.”
Increasing cyber and hybrid risks will test the European Union’s system of fragmentation on issues of security, while oversight of financial and other economic issues is more centralised. We recommend that EU finance ministers increase the resilience of the financial system through regular preparedness exercises and greater consideration of system-wide regulatory issues. We also consider it necessary to advance a broader political discussion about the integration of the EU security architecture as it applies to the financial system. This includes reopening the framework on foreign-investment screening in order to ensure screening at EU level of foreign investment in critical financial infrastructure.

Maria Demertzis
The energy transition and climate change have become issues of paramount importance. In the past year, Bruegel’s research in the area focused on four themes: energy issues for Europe; geopolitics and energy; economic opportunities and challenges related to making our societies net-zero emissions; and delivering on the Paris Agreement.

However, the climate emergency calls to step-up the game, and it has become a cross-cutting theme in Bruegel’s research.
DECARBONISING GLOBALLY

GREEN DEAL AND FISCAL RULES
The recipe for success for the European Green Deal is as simple as it is breathtaking: to intelligently promote deep decarbonisation by accompanying the economic and industrial transformation this necessarily implies, and by ensuring the social inclusiveness of the overall process. Should this experiment succeed, the European Green Deal might become a blueprint for other economies around the world.

Simone Tagliapietra
Green Deal and fiscal rules

Gregory Claeys at Bruegel makes the case for the Green Deal offering a flexible interpretation of the budget rules to spark investment: “Well defined green investments, financed through the issuance of green bonds, could be clearly separated from the rest of the budget and exempted from the rules.”

“This reform, limited to the investment clause, would not put an end to the debate about the European fiscal framework and would not solve its many flaws, but it would be a good first step.

Georg Zachmann
In 2019 we examined how the EU can use innovation, competition and the digital economy to establish itself in an increasingly bipolar world.

We continued our work on robots and automation and the effects on labour displacement, because recent literature has not been able to estimate accurately the replacement effect of automation. Our scholars also looked at whether the EU needs to adapt its competition policy in the face of unfair competition from third countries.

We have also linked the discussion on competition and industrial policy to the issue of sustainability. The energy and transport sectors are undergoing profound transformations driven by low-carbon technology and strong decarbonisation policies. There is a real opportunity to turn this into an industrial revolution in Europe. But to do so, the right industrial policy tool-kit must be put in place.
Digitalisation will be at the core of maintaining Europe's economic sovereignty, supporting the EU's climate strategy and ensuring economic growth, employment and competitiveness. Key measures should include pushing for public funding for artificial intelligence and robotics, and promoting private funding for digital start-ups and scale-ups.

J. Scott Marcus

In principle we have good research capabilities in Europe, but we are under investing, and in many cases the talented researchers go elsewhere where they get better paid," said J. Scott Marcus, a senior fellow with Brussels-based think tank Bruegel. "In some critical areas like artificial intelligence and machine learning, the lead tends to be in the United States, and China is rapidly coming up. It’s a big problem. There’s a whole innovation engine here that needs to be torqued up.
COMPETITION AND INDUSTRIAL POLICY

Is it a good idea to promote European champions by changing the competition rules? Researcher Georgios Petropoulos of the Brussels think tank Bruegel considers this path "dangerous". Competition policy that for political reasons is more friendly to some companies than to others "loses its credibility," he says. "It will be challenged legally and will lead to chaos.

Georgios Petropoulos

DIGITAL SLEEPING BEAUTIES

A digital divide in the corporate landscape is looming, with old, small firms in particular more likely to fall behind on investments in the latest digital technologies (including big data analytics), and with no plans to catch up. As these firms are also less innovative and create fewer new jobs, awakening them from their digital slumber should be high on the digital policy agenda.

Reinhilde Veugelers

Fear of missing out

Reinhilde Veugelers, said: “My fear is that, as the EU does not have strong digital innovators, it may also miss the next waves of digitalisation.”

FINANCIAL TIMES

A BALANCED GOVERNANCE

Transparency independent
Bruegel’s distinctive nature rests on a balanced partnership between private and public stakeholders.

Our membership is composed of EU governments, international corporations and independent institutions.

With membership fees constituting more than 84% of the annual budget, but no single member contributing more than 4%, Bruegel is able to collaborate with a wide range of partners while protecting its principal assets: independence, professional integrity and objectivity.

Bruegel is committed to the highest levels of transparency, at the level of the institution and at the level of individual scholars. This level of disclosure represents a unique standard in public transparency for think-thanks.
Ratifies the appointment of the board and of the director and deputy director.

Approves the budget and the accounts.

Participates in the design of the Research Programme through multilateral consultations, and bilateral exchanges involving each member individually.

State members | Corporate members | Institutional members

Election of 3 members each

BOARD
Bruegel's general administrative body
Meets three times every year

11 members (6 elected, 5 appointed)
Chair: Jean-Claude Trichet

Works with the management team to guide the organisation, holds director accountable.

Approves the budget and the annual research programme, which is prepared on the basis of a wide consultation of members.

Approves new members and senior staff.

SCIENTIFIC COUNCIL
Bruegel's advisory body
Meets every year

8 members
Chair: Svend E. Hougaard Jensen

Advises Bruegel's board and management.

Assesses the scientific quality of Bruegel's output with a yearly report.

Attends Bruegel's board meetings through presence of the chair.

EXECUTIVE MANAGEMENT
Bruegel's executive body

Director: Guntram B. Wolff
Deputy director: Maria Demertzis

Executive management • Research supervision • Editorial responsibility
Preparation of research programme & board meeting
Members are at the core of our organisational framework. They engage in a partnership, an exchange of ideas and a commitment to Bruegel’s mission.

Their representation on the board, their contribution to the research agenda, their interactions with scholars and their participation in events ensure that Bruegel remains accountable and relevant.

Members are committed to Bruegel’s transparency and integrity standards. They recognise Bruegel’s independence and agree to refrain from seeking to influence Bruegel’s research work or to obstruct publication. We are grateful to all our members for their support.

*As of April 2020*
The board reflects the diversity of Bruegel’s stakeholders. An 11-person group, it is made up of high-ranking individuals from government, industry, academia and civil society. Each member acts in a personal capacity.

A spread of backgrounds, nationalities and genders is guaranteed through a combination of elections and appointments, reflecting Bruegel’s nature as a public good.

The members of the board (as confirmed at the General Assembly in March 2020) are:

**Jean-Claude Trichet (Chairperson)**  
Former President, European Central Bank

**Karolina Ekholm**  
Professor of Economics, Stockholm University

**José Manuel González-Páramo**  
Executive Board member of BBVA

**Jörg Kukies**  
State secretary at the German Federal Ministry of Finance

**Rachel Lomax**  
Former Deputy Governor of the Bank of England and a member of the Monetary Policy Committee

**Monika Marcinkowska**  
Professor of Banking & Finance, University of Lodz

**Isabelle Mateos y Lago**  
Managing Director, BlackRock Investment Institute

**Simone Mori**  
Group Head of European Affairs, Enel

**Elena Pisonero**  
Chairperson, Taldig

**Alessandro Rivera**  
Director General of the Treasury, Italian Ministry of Finance

**Tuomas Saarenheimo**  
Permanent Under-Secretary at the Ministry of Finance, Finland

We would like to thank Thies Büttner, Luigi Paganetto and Pawel Samecki for having served in the board in 2019.
THE SCIENTIFIC COUNCIL

The scientific council consists of internationally recognised economists appointed by the board for a three-year mandate. It advises Bruegel's board, director and deputy director, and assesses the scientific quality of Bruegel's output. The scientific council chair attends board meetings.

Svend E. Hougaard Jensen (Chairperson)
Professor of Economics and Director of the Pension Research Centre (PeRCent) at Copenhagen Business School

Elena Carletti
Professor of Finance at Bocconi University

Meredith Crowley
Professor of Economics at Cambridge University.

Fernando Fernandez
Full Professor of International and Financial Economics at IE Business School

Naika Foroutan
Vice-director of the Berlin Institute on Integration and Migration Research

Justus Haucap
Director, Düsseldorf Institute for Competition Economics at Heinrich-Heine-University of Düsseldorf

Thomas Philippon
Professor of Finance at New York University, Stern School of Business

Lazlo Varro
Chief Economist, International Energy Agency
MANAGEMENT TEAM

GUNTALAM B. WOLFF
Director
Guntram is responsible for Bruegel's overall executive management, for the preparation of the board meetings, the preparation of Bruegel's strategy, the research strategy and the hiring of staff. He exercises editorial oversight and quality control. Guntram was deputy director of Bruegel before being appointed director in 2013. Before this, he worked on euro-area governance at the European Commission and fiscal policy at the Bundesbank. He holds a PhD in economics from the University of Bonn and has published in leading academic journals.

MARIA DEMERTZIS
Deputy Director
Maria assists the director in leading the organisation, with a specific focus on shaping the research programme and ensuring its execution is of the highest quality, as well as the financial management of the organisation. She has previously worked at the European Commission and the research department of the Dutch Central Bank. She has also held academic positions at the Harvard Kennedy School of Government in the USA and the University of Strathclyde in the UK, from where she holds a PhD in economics.

GIUSEPPE PORCARO
Head of Outreach and Governance
Giuseppe is responsible for organisational governance, for outreach to the membership and for communications through media relations, online channels and events. He has extensive experience of organisational management, communication and policy development. He was secretary general of the European Youth Forum and previously worked at the World Bank in Kosovo and Paris. Giuseppe holds a master’s degree in international relations and a PhD in geography of development from the University of Naples L’Orientale. He also contributes to research related to European narratives and the impact of technology on democracy and political communication.

SCARLETT VARGA
Head of Development
Scarlett leads Bruegel's development team and is in charge of developing and implementing Bruegel’s fundraising strategy and partnership efforts. Prior to working at Bruegel, she worked for the renewable energy industry (solar) on research and industry-led projects. She worked and travelled extensively in Latin America, setting up energy cooperatives in the Atacama region and Patagonia. She is trained in Economics and Business (BSc) and the European Union’s Financing Schemes (MA).
INDEPENDENT FUNDING

Understanding who funds think-tanks, and to what end, is an important part of maintaining the reputation our sector has for independence.

Bruegel’s management is required by the board and members to pursue balanced funding, with goals stipulating the proportion of funding that should be received from membership and non-membership sources.

Bruegel is therefore committed to building a diverse set of stakeholders, to help buttress independence and to enable the budget to cover the funding cycle. Diversity of funding also allows Bruegel to operate during downturns in the business/funding cycle. Our funding structure is based on:

**Core funding**
84.20% of funding comes from the membership programme:
- EU member states
- Corporations
- Central banks and autonomous institutions

**Non-core funding**
- Grants from European institutions for specific multi-annual research projects or papers. This also gives Bruegel an opportunity to interact with policy-making institutions and makes advocacy for Bruegel’s work more effective.
- Grants from private organisations, such as foundations and research institutes. Bruegel adopts a flexible approach to cooperation. Joint activities with partners focus on intellectual dialogue through visiting fellowships, joint publications and policy debates with relevant decision-makers and practitioners.
No member contributes more than a small percentage of the annual budget (typically less than 4% for countries and less than 1% for companies), which protects independence further. An arm’s-length relationship with members is also guaranteed by Bruegel’s statutes and bylaws, which clearly define the role that members play in the organisation.

The financial statements fully detail our funding streams for both core and non-core funding.

Bruegel’s development is planned to be organic, with a gradual expansion of the membership programme and the sustainable growth of other funding streams in harmony with Bruegel’s core values. Making Bruegel’s financial future sustainable also relies on constant innovation in operations: finding ways to cut costs whilst expanding output.

Bruegel maintains reserves of just over 2 252 995,33 EUR (end of 2019). These reserves make six months’ operating costs available and help maintain financial stability. Bruegel’s cash flows are carefully managed and Bruegel has never borrowed to finance operations or to make capital investments.

STATUTORY AUDITOR’S REPORT TO THE GENERAL MEETING OF MEMBERS OF THE ASSOCIATION BRUEGEL FOR THE YEAR ENDED 31 DECEMBER 2019

In the context of the statutory audit of the annual accounts of the association Bruegel (the association), we hereby present our statutory auditor’s report. It includes our report on the annual accounts as well as the other legal and regulatory requirements. This forms an integrated whole and is indivisible.

We have been appointed as statutory auditor by the general meeting of members of 8 May 2018, following the proposal by the board of directors. Our statutory auditor’s mandate will expire on the date of the general meeting of members which will deliberate on the annual accounts closed on 31 December 2020. We have performed the statutory audit of the annual accounts of the association Bruegel for 8 consecutive years.

Report on the annual accounts

Unqualified opinion

We have audited the annual accounts of the association, which comprise the balance sheet as at 31 December 2019, the profit and loss account for the year then ended and the notes to the annual accounts, characterised by a balance sheet total of € 4,404,989 and a profit and loss account showing a negative result for the year of € 262,164.

In our opinion, the annual accounts give a true and fair view of the association’s net equity and financial position as at 31 December 2019, as well as of its results for the year then ended, in accordance with the financial reporting framework applicable in Belgium.

Basis for unqualified opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs) as applicable in Belgium. Our responsibilities under those standards are further described in the ‘Statutory auditor’s responsibilities for the audit of the annual accounts’ section in this report. We have complied with all the ethical requirements that are relevant to the audit of annual accounts in Belgium, including those concerning independence.

We have obtained from the board of directors and the officials of the association the explanations and information necessary for performing our audit.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.
Responsibilities of the board of directors for the preparation of the annual accounts

The board of directors is responsible for the preparation of annual accounts that give a true and fair view in accordance with the financial reporting framework applicable in Belgium, and for such internal control as the board of directors determines is necessary to enable the preparation of annual accounts that are free from material misstatement, whether due to fraud or error.

In preparing the annual accounts, the board of directors is responsible for assessing the association's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the board of directors either intends to liquidate the association or to cease operations, or has no realistic alternative but to do so.

Statutory auditor's responsibilities for the audit of the annual accounts

Our objectives are to obtain reasonable assurance about whether the annual accounts as a whole are free from material misstatement, whether due to fraud or error, and to issue a statutory auditor’s report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these annual accounts.

When performing our audit, we comply with the legal, regulatory and standards framework that applies to the audit of the statutory accounts in Belgium.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the annual accounts, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Association’s internal control;

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the board of directors;
• Conclude on the appropriateness of the board of directors’ use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Association’s ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our statutory auditor’s report to the related disclosures in the annual accounts or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our statutory auditor’s report. However, future events or conditions may cause the Association to cease to continue as a going concern;

• Evaluate the overall presentation, structure and content of the annual accounts and whether the annual accounts represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the board of directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identified during our audit.

Other legal and regulatory requirements

Responsibilities of the board of directors

The board of directors is responsible for the compliance with the legal and regulatory requirements regarding bookkeeping, as well as for compliance with the Law of 27 June 1921 on non-profit associations, foundations, European political parties and European political foundations or, as of January 1st 2020, the Code of Companies and Associations, and with the Association’s by-laws.

Responsibilities of the statutory auditor

In the context of our mandate and in accordance with the Belgian standard which is complementary to the International Standards on Auditing (ISAs) as applicable in Belgium, it is our responsibility to verify, in all material aspects, the compliance with certain provisions of the Law of 27 June 1921 on non-profit associations, foundations, European political parties and European political foundations or, as of January 1st 2020, the Code of Companies and Associations, and with the by-laws, as well as to report on these elements.

Statement related to independence

Our audit firm and our network did not provide services which are incompatible with the statutory audit of annual accounts, and our audit firm remained independent of the association throughout the course of our mandate.
Other statements

- Without prejudice to certain formal aspects of minor importance, the accounting records are maintained in accordance with the legal and regulatory requirements applicable in Belgium.

- There are no transactions undertaken or decisions taken in breach of the by-laws, the Law of 27 June 1921 on non-profit associations, foundations, European political parties and European political foundations or, as of January 1st 2020, the Code of Companies and Associations, that we have to report to you.
